🎯 Aim

Enable automated builds in Jenkins by linking it to a project folder and triggering execution through terminal-based code updates.

⚙️ Final Steps

1. **Create Project Folder**
   Store your AI/DS project in a local directory (e.g., C:/project).
2. **Initialize Git Repository**
   Open terminal in project folder and run:

```
git init
git add .
git commit -m "Initial commit"
```

3. **Create Jenkins Job**
   - Open Jenkins dashboard
   - Click **New Item**
   - Select **Freestyle Project**
   - Enter project name and create
4. **Configure Build Step**
   - Go to **Build → Execute Shell / Batch Command**
   - Add:

```
cd C:/project
python app.py
```

5. **Enable Build Trigger**
   - Go to **Build Triggers**
   - Select **Poll SCM**
   - Enter:

```
H/2 * * * *
```

6. **Push Code from Terminal**

```
git add .
git commit -m "Update"
git push
```

7. **Automatic Build Execution**
   Jenkins detects changes and automatically runs the build.

✅ Result

Jenkins successfully triggers automated builds based on code updates pushed through the terminal.
